CYBER TRAINING

As part of your cyber package, you have access to ongoing cyber training for your team.

Once we have setup your learners they will receive an introduction email, login details and 2 training videos to start on. From there they will then receive a training video per month.
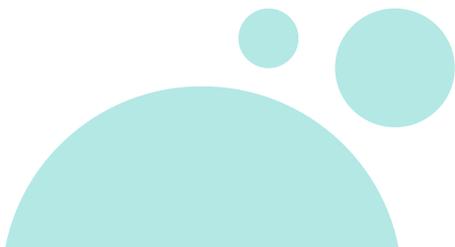

Videos range from 2-4 minutes and are based on real events that have occurred. Once the learner has finished the video, they will be asked a couple of multichoice questions. If they fail the questions, they are then sent targeted training based on the specific cyber content.

You can check the Training Schedule, Reports and how your team is doing on the portal under Security Awareness Training.

Please fill in learners for the cyber training platform:

FIRST NAME	LAST NAME	EMAIL ADDRESS

*Please note email addresses need to be different per team member as training and simulations are sent to each user and therefore, they cannot be the same email address. If you would like to train more people, please speak to your account representative.

PHISHING SIMULATIONS

Another good method to keep your team thinking about Cyber Security is through simulations.

Please answer the following questions for us to setup your simulations.
These questions are to provide more direct simulations based upon platforms your team uses and information around the business.

QUESTION	ANSWER
Name of CEO?	
Name of IT Manager?	
What industry are you in?	
What city are you located in?	
What is your main office address?	
What platform do your run your email service through?	Google Apps, Office 365, Other
What services are your staff likely to use?	Netflix, Apple Store, Amazon, Myer
What accounting software do you use?	Xero, MYOP, Other, Don't use one

Please note our simulations are safe and will not infect a device, its sole purpose is to identify learners who need more assistance and provides your business with an overview on which learners could potentially be a cyber risk to the business.

Any learners who click on a phishing simulation will receive targeted training around the importance of good practices and their obligations to keep the business secure.

You can check the Simulations that are in the schedule along with how your team is doing on the portal under Phishing Simulations.
